HARDWARE SPECIFICATION & COMPLIANCE SHEET

Product Name: Quantum Precision Temperature Sensor (Model QS-2026)

Manufacturer: NeoSensors Industrial Automation GmbH

Date of Calibration: October 14, 2026

Operating Voltage: 3.3V DC to 5.0V DC. Operating Temperature Range: -40°C to +125°C.

Accuracy Rating: +/- 0.05°C with digital I2C bus interface.

Compliance Certifications: CE Mark, RoHS Compliant, ISO 9001:2015 certified manufacturing standards.

Maintenance Protocol: Annual recalibration recommended using certified liquid-nitrogen reference wells.
