MASTER SOFTWARE CONSULTING AGREEMENT

This Software Consulting Agreement ("Agreement") is executed on October 20, 2026, by and between Apex Global Technologies Inc. ("Client") and Tanmay Sharma ("Contractor").

RECITALS: Client desires to retain Contractor to architect and implement an open-source, privacy-first document organizer known as LazyDesk AI, leveraging on-device Gemma models and local Ollama inference.

SCOPE OF SERVICES: Contractor shall deliver a fully functional MERN stack web application with document extraction, text sanitization, structured categorization, and review workflows for Hacktoberfest 2026 Week 3.

COMPENSATION & TERMS: Total contract consideration is $12,500 USD, payable upon milestone completion. All work product shall be published under the open-source MIT License.

CONFIDENTIALITY & DATA SECURITY: No document data, customer personal identifiable information (PII), or private keys shall be transmitted to external cloud AI providers. All inference must remain 100% on the local perimeter.
